User Manual for BookBot

Installation:

- Install Telegram to your device
- Click the search icon on top right side
- Type "googlebookbot" and add the BookSearchBot to your Telegram
- From now on you can see BookSearchBot in your chats.

First usage:

- When you enter the chat for BookSearchBot for the first time, you see a description of the BookSearchBot and a start button
- Click on start to begin conversation
- BookSearchBot will ask you if you want to answer some questions which includes learning your name and book interests.
- You can accept the question by saying things like *yes, of course, sure, affirmative* or you can reject it by saying things like *no, nah, nope, no way*.
- If you accept BookSearchBot will ask you your name, you can say your name by saying *Call me Bookworm, I am Bookworm, My name is Bookworm* etc.
- Then BookSearchBot will ask your book interest, you can say *I like biology books, I love mystery books, I prefer science fiction* etc.
- At last, BookSearchBot will ask you if you want to use daily recommendation system. You can accept or reject it like you did in previous question.
- When all chit chat questions are asked, you can search books.

Finding books and feedback:

- You can search books by saying *Show me Dune books, show Harry Potter books* etc.
- Once you search for a book, BookSearchBot will give you a list of books for your search.
- You can apply filters on the list based on author, category or page number by saying *show books written by Frank Herbert, filter fiction books, I want to see books shorter than 500 pages* etc.
- You can filter or search books again and again.
- When you want to see details of a book, you can get it by looking the order of that book in the list and say *get me the 1st book, I want to see details of the third book, show 5th book please* etc.
- After getting details of a book, you can click on the Amazon link to buy the book, go back to last list of books by saying *go back to last list, get me the list again* etc., search another book by saying *I want to search another book, search books* etc. or you can view or give feedback for that book.
- To give feedback, you should say *I want to give feedback, I will give feedback* etc. Than the BookSearchBot will ask if the feedback will be a comment or a rate. You can select it by saying *I will rate, I want to comment, rate, write comment* etc. After you select it, you can write your comment/rate and send it, BookSearchBot will save your comment/rate.
- To view feedback, you should say *I want to view feedback, I will view feedback* etc. Than the BookSearchBot will show you the comments and rating of that book.
- After viewing or giving feedback, BookSearchBot again asks you if you want to view or give feedback. You can go back to search books or last list too by saying *no* to the question.

Other:

- Once you close Telegram, BookSearchBot will remain in the last state you left of so you can continue from where you left of or you can always start from the beginning by typing /start
